## WindyGridworldEnv Transition Table

## Lab Instructions

Let's revisit the WindyGridworldEnv environment. Go to the lib\envs folder and open the windy\_gridworld.py file.

By now you should be quite familiar with this environment, its different states, and how the reward structure is implemented.

Consider the following state in this environment:

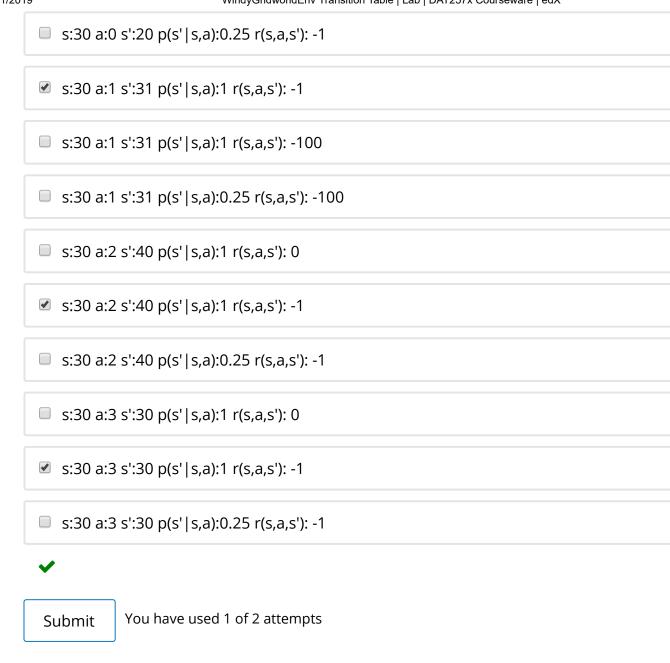

## Lab Question

1/1 point (graded)

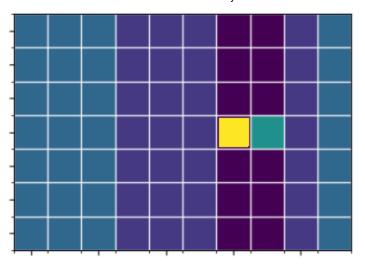

Which four of the following represent transition probabilities and expected rewards??

- ✓ s:30 a:0 s':20 p(s'|s,a):1 r(s,a,s'): -1
- s:30 a:0 s':20 p(s'|s,a):1 r(s,a,s'): -100

✓ Correct (1/1 point)

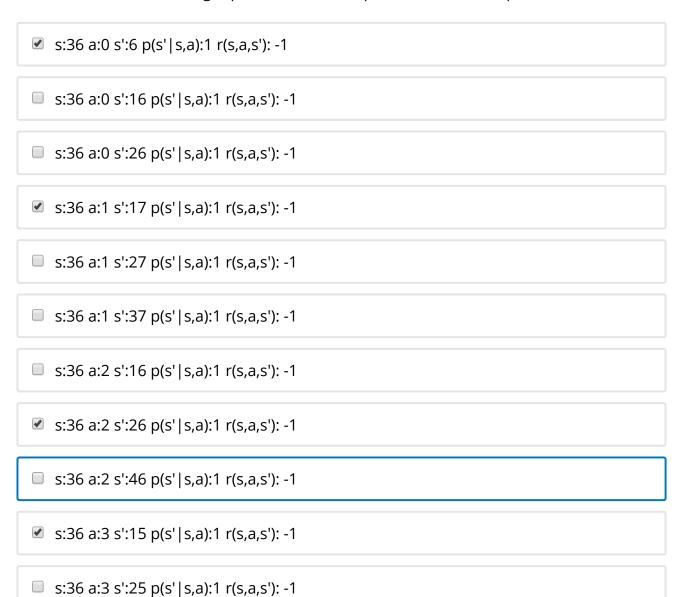

Now consider the following state in this environment:

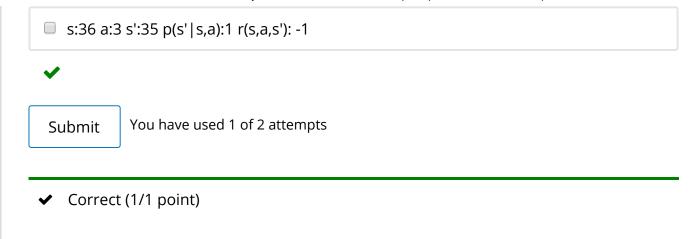

## Lab Question

1/1 point (graded)

Which four of the following represent transition probabilities and expected rewards?
